

# Using Data to Improve USAJOBS.gov

Project Title	Using Data to Improve USAJOBS.gov
Project Summary	Work with USAJOBS.gov data analysts and program officers to determine what changes can be made to improve one of the most used government websites!
Country	United States
Agency	Office of Personnel Management
DoS Office	N/A
Post	N/A
Section	N/A
Number of Interns	1

## Project Description

The team behind USAJOBS.gov, the U.S. Government’s official hiring website, uses a variety of site performance and user satisfaction metrics to make decisions on new functionality and design. USAJOBS receives over 16 million visits a month and over 355,000 applications per year. Throughout the website, user experience is monitored and surveyed. This information is then made available to the USAJOBS Data & Analytics Team to examine and make recommendations on new features or design tweaks.

As a VSFS eIntern, you’ll work with us to analyze this data, make recommendations for new metrics, and to remove bottlenecks from the federal hiring process!
